1900 - Graduated from Iron City College (Commercial)

Pittsburgh, Pa.

Read Law for three years in addition to my regular work.

1902 Entered a prominent builders office in Pittsburgh and made a thorough study of all branches of building construction. Left this office in 1914. Accepted a position in New York City with one of the largest construction companies in that city, remaining there until 1917 when I received a more attractive proposition.

1917 - Accepted a position with my present employers, Warren, Moore and Company, Philadelphia, Pa., and am in full charge of the Estimating Department and the Sub-letting of all work.

As you will see from the above my experience covers a period of eighteen years in which time I have made a thorough study of all branches of building construction and design and am at present specializing in reinforced concrete construction and design. My education along the above lines has been very thorough, practically all of my education has been from private instruction and the practical knowledge of the actual work done together with the practical experience received during the past eighteen years.

Signed

Minnie R. Franke
