## ... feature fraternity

Alpha Kappa Psi, the first and oldest commerce fraternity, was founded on October 5, 1904, in the School of Commerce Accounts, and Finance at New York University, New York, N.Y., and was incorporated under the laws of the State of New York on May 20, 1905. Institutions in which A. K. Psi has installed chapters are accredited by every College and Secondary School Association of any consequence in the United States.

\* \* \*

The aims of A. K. Psi are "to further the individual welfare of its members; to foster scientific research in the fields of commerce, accounts, and finance; to educate the public to appreciate and demand higher ideals therein; and to promote and advance in institutions of college rank, courses leading to degrees in business administration.

Since 1904, 63 student chapters have been installed in leading educational institutions the country over. The Beta Omicron Chapter here at Wayne University is one of the newcomers to the fraternity having been founded May 18, 1941.

Despite its newness the Beta Omicron Chapter is well recognized in the fraternity, having managed to cop the annual efficiency contest award from 62 other chapters last year by turning in a perfect score of 100,000 points. And despite the attempts of competing chapters to wrest away her laurels she intends to fight hard to make it two in a row.

\* \* \*

Being a member chapter of a professional fraternity necessitates the formulation of a definite program of professional activity each year. Such activity includes speakers on economics, business and educational subjects, industrial tours, research projects, service to the school and innumerable other activities.

During the '47-'48 fraternal year for example the chapter has participated in the following professional activities to date:

Nov. 14, '47—Malcolm Bingay, *Detroit Free Press* editorial writer, spoke on the subject of college education today.

Oct. 29, '47—Mr. Edwardson of the Easterling Silver Co. addressed the group on the Art of Salesmanship.

Dec. 21, '47—Mr. Jas. P. Welsh, triple "A's" Old Traveler, recalled some of his many voyages and trips for the boys.

## STUDENT COUNCIL

Organized to promote the interests of the student body and the University in all matters pertaining to student government, the Student Council is the highest governing authority on campus at the student level. This year's Council was a direct result of the increased tempo of campus "politics." During the spring election in 1947 the greatest number of student voters turned out to elect "slates" to the top student positions. Elected president was Virginia Murray, who later resigned to become Mrs. Don Fuller. George Squire, law, took over the gavel.

\* \* \* \* \*

Many issues faced the Council during its two-semester term. Student discipline for off-campus activities, violation of regulations by campus groups, DSR passes for students, recognition of the National Student Ass'n—each required considerable research and consideration. At the same time, a revision of both Council by-laws and changes in the Manual of Politics and Procedures were being carried out. Student Community Service Committee was activated to centralize all charity drives under one collection. ABC (Athletic Booster Committee) was granted a vastly increased budget for attracting more rooters to Wayne games. (It worked, too.) But, an unfortunate tradition, the Council lost to the Collegian in the annual Goodfellow sale and once again had to stand treat for 20 scribes at a turkey dinner.

LUMBER — HIGH GRADE MILL WORK

3051 W. Fort St.                      TO 5-0922

*T*ODAY, Aladdin's genii would have first-class inferiority complexes. The trouble? There are so many man-made wonders to show them up as "bushers" in the Miracle League.

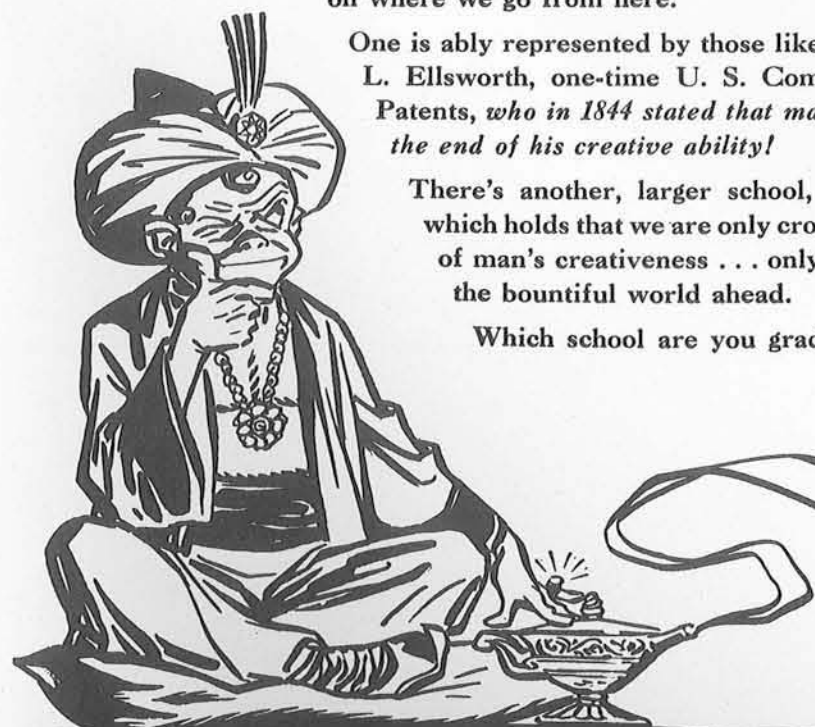

Could any amount of lamp rubbing produce, for example, such out-of-this-world things as: the electron microscope, germ-killing lamps, jet planes or the electric eye? They've also switched radar from the battlefield to the kitchen in a dingus which will roast a hot dog, or broil a steak, before you can draw a cup of coffee to go with it. It's enough to give any Class A genie a nervous breakdown.

And, as always, there are two schools of thought on where we go from here.

One is ably represented by those like Mr. Henry L. Ellsworth, one-time U. S. Commissioner of Patents, *who in 1844 stated that man had reached the end of his creative ability!*

There's another, larger school, thank goodness, which holds that we are only crossing the threshold of man's creativeness... only beginning to sense the bountiful world ahead.

Which school are you graduating into?
